Software Tester

✉ avinashalde@gmail.com

☎ +91 6369 195 768

I've hands on 2 Years of experience in testing client-server applications, web-based applications, and many other programming languages. Being a QA engineer, I do have experience in preparing test plans, writing test Cases. I use to attend several meetings with project managers, business analysts and sometimes with clients

CAREER OBJECTIVE

July 2021 - May 2023

- 2 Years of Experience in Software Testing using Selenium Web Driver.
- Experience in Test Case Design, Test Execution, Bug tracking and Reporting.
- I have good Experience in web application using Selenium Web Driver
- Having good experience in automation frameworks such as Cucumber BDD, TestNG, JUnit, POM and Data Driven framework
- Maintaining the checkout and check in the source code from GITHub.
- Good Knowledge in API using Postman for Manual and Rest Assured for Automation testing
- Designed and documented Restful HTTP Methods and using Rest Assured for Automation along with JSON parser validation and Assertions
- Generating the Detailed reports of the Bugs, Test Execution summary reports.
- Attended Weekly/Daily reports to clients based on the status of execution/defects. I Used JIRA for Defect management and Tracking defects to the release.

Experience

INFOSYS BPM- LIMITED

Bank of America Project

- API -Tester

Dec 2022 - May 2023

- **Test Strategy Development:** Collaborate with the development and quality assurance teams to define the overall API testing strategy, including test scope, objectives, and methodologies.
- **Execution and Reporting:** Execute API tests and analyze results, promptly reporting defects and issues in a clear and structured manner. Collaborate with developers to address issues and verify fixes.
- **Performance Testing:** Conduct API performance testing to assess response times, throughput, and scalability under different load conditions.
- **Designed and documented :** Restful HTTP Methods and using Rest Assured for Automation along with JSON parser validation and Assertions.
- **Test Case Design:** Design comprehensive test cases that cover various aspects of API functionality, including request and response validation, error handling, data integrity, security, and performance.

Koodok Technologies

July 2021 - Dec 2023

LIDL- Economic Project Automation Tester

- **Test Automation Strategy:** Collaborate with cross-functional teams to develop a comprehensive test automation strategy that aligns with project goals and quality standards. Worked individually to conceptualize the website design for new changes on the company's website and successfully chosen
- **Test Framework Design:** Design and implement efficient and scalable test automation frameworks that cater to the specific needs of the application and technology stack.
- **Continuous Integration/Delivery:** Integrate automated tests into the CI/CD pipeline to ensure quick and reliable feedback on code changes, supporting a culture of continuous integration and delivery.
- **Test Execution:** Execute automated test suites, analyze results, and promptly report defects, working closely with developers to resolve issues.
- **Cross-Browser and Cross-Platform Testing:** Automate tests to ensure compatibility across different browsers, devices, and platforms.

languages

- Core java
- Java Script
- Structure Query Language.
- API JSON

Ide

- Eclipse 2023
- Visual Studio Code
- Sql Developer
- Postman

Skills

- Selenium WebDriver
- Data Driven
- Git - Version control
- Jira - bug tracking
- Allure Report
- Test Case Writing
- Maven
- SQL Query

framework

- Cucumber-BDD
- J-unit
- spring boot
- TestNG
- Page Object Model
- Rest Assured API testing

Education

School

- Selva Mr Higher Secondary School
- 67%

2012-2014

Collage

- Saveetha school of Engineering Chennai
- Mechanical engineer.
- GPA: 7.83

2014-2018

Roles and Responsibilities:

- Involved in Automation Framework Development implementing Page Objects, Maven, Selenium Web Driver –Java, cucumber.
- Analyzing and understanding the user stories and acceptance criteria.
- Identifying the test cases which need to be automated and which cannot be automated.
- Reviewed the Test Basis, designed and documented Test Strategies, Test Plan, Test Cases and executed test cases.
- Wrote highly efficient and maintainable Java code to develop Page Objects using the Selenium Framework.
- Execution of Tests and Reporting Defects using JIRA.
- Analyzing the test result and maintain the test reports using JVM reports
- Responsible for Functional junit, using Black box Testing Techniques.
- Analyzing the test result and maintain the test reports using JVM reports
- Debug and fix the Script issues

DECLARATION

Experienced and highly skilled Automation Tester with a passion for ensuring the highest levels of software quality through automated testing solutions. I possess a strong background in test automation frameworks, scripting languages, and quality assurance best practices. My goal is to leverage my expertise to contribute to a dynamic organization, streamline testing processes, and deliver reliable, high-quality software products.
